New ConTex-Commentary - issued:

04.05.17

The rapid increase of the New ConTex somewhat leveled of this week with a gain of only 3 points. Apart from the largest segment all categories still posted positive results.

The market however appears to remain uncertain about the mid term direction of charter rates as the spread between the 12 and 24 months periods currently stands at around 10%, indicating only slightly rising rates over the next two years. On the other hand some owners might just be looking for income security, even at those in absolute terms still low rates, after having to trade their vessel at or below operating expenses for considerable periods during the last couple of years.
