New ConTex-Commentary - issued:	04.03.21
<p>The sharp upward curve in the New ConTex development continues and with some segments increasing with a speed unheard of so far. For instance above 3500 TEU all segments increasing by more than 3% on a week-on-week basis or as illustrated by the 24 months rate assessment for a 4250 TEU type of more than USD 2.000 per day. The year-on-year development is just about 120%! The overall ConTex value improved with another 2.8% reaching 888. In some cultures '8' is a lucky number...thence the triple '8' must certainly indicate a direction ? With the tonnage supply for the year tightening operators are forced to look ahead and this week transactions has been concluded with time counting as from July-august and with the average periods concluded becoming longer. For prompt deliveries in March and April some operators in some of the segments may now risk facing a 'sold-out' sign when seeking new tonnage.</p>
