New ConTex-Commentary - issued:	17.06.21
<p>Since the start of 2021 there has been an unparalleled surge of charter rates in all ship sizes (including vessels below 1000 teu), and now we are at the end of the second quarter this escalating market is very difficult to contain or even predict. Demand for Charter tonnage still exceeds available positions and this trend is forecast to remain for the foreseeable future. Indeed, in the past week, we estimate that there has only been around 30 containerships circulated in the market open June-August worldwide. Week-on-week we see another stable increase of 4,0%, slightly higher than the rate of increase last week. Moreover, month-on-month we see a change of 13.8%. 1700s were the biggest mover in percentage terms increasing 5.7% week-on-week for 12 months period, although in reality some owners are asking for a few thousand dollars above last done. Every other size increased between 3% and 5%, with 6500s seeing the largest nominal increase of USD 2689pd. As we all begin to enjoy the sunshine, cocktails and European Championships we expect a distinct lack of fixing activity, but expect owners ideas and the New ConTex to continue soaring to historically high levels</p>
