New ConTex-Commentary - issued:		29.07.21
<p>Another warm summer week passed by, in a continually hot container market. Activity was still limited since no spot/prompt ships are around, with the smallest feeders by far the most active segment as here we will see some available tonnage in the not too distant future. This is also reflected in this week's ConTex development, with significant improvements in the 1100 TEU and 1700 TEU segments. It is to be expected that the feeder sizes will improve in the weeks to come. As seen throughout the year, periods are becoming longer and rates stronger on a fixture to fixture basis. The market is also still being influenced by the "newcomers" to the market, being freight forwarders and shippers, trying to secure tonnage by increasing numbers for "short" term fixtures. It seems that there is still no sign of a slowing market, as people are slowly coming back from holidays in the next week or two, it is inevitable that activity will continue, with various market players trying to secure tonnage for the remainder of the year. This week's ConTex confirms the positive trends in basically all vessel size segments. The demand is there for smaller feeders up to post Panamax and, up to now, there are no signs that it will change any time soon.</p>
