New ConTex-Commentary - issued:		26.06.25
<p>The container market experienced a stable week with limited activity, possibly indicating that summer is approaching, which is typically a slow period. Despite this, underlying demand remains across all regions, although prompt supply is lacking in all segments. Owners remain bullish on their forward positions, making it difficult to draw conclusions as operators may be stepping back to reassess. Rates have stabilized with minimal to no change from the previous week, though there is a steady month-to-month increase of 2.6% and a healthy 19.6% rise compared to the same week last year. Smaller feeders, which saw significant dips last year, have surged recently as they remain the only available tonnage, making them the biggest winners. The index reflects stability, rising by 0.2% to 1,525, with small fluctuations expected over the summer holidays. All segments show less than 1% variation from last week, but year-on-year data reveals that segments of 1,700 TEU and below have increased by at least 30%, highlighting the strong momentum of these feeders, which owners are likely to capitalize on during the summer. The market remains robust, and it will be interesting to see how the second half of the year unfolds after the summer.</p>
